PROFESSIONAL SUMMARY

Entry-level AI/ML Engineer with an MCA in Data Science and hands-on experience building Machine Learning and Generative AI applications using Python. Skilled in Scikit-learn, PyTorch, TensorFlow, LLMs, RAG, embeddings, vector search, LangChain and Azure OpenAI, with knowledge of FastAPI, Docker, Git and CI/CD.

TECHNICAL SKILLS

Programming: Python, SQL, Core Java, Data Structures & Algorithms, OOP

Machine Learning: Scikit-learn, Regression, Classification, Clustering, Ensemble Learning, Feature Engineering, Model Evaluation, Hyperparameter Tuning

Deep Learning: PyTorch, TensorFlow, Keras, Neural Networks, CNN, RNN, LSTM

Generative AI / LLM: Transformers, Hugging Face, LLMs, Prompt Engineering, RAG, Embeddings, AI Agents, Function Calling

AI Frameworks: LangChain, FAISS, MLflow

Backend & MLOps: FastAPI, Flask, REST APIs, Docker, Git, GitHub, CI/CD, Model Deployment

Data & Databases: Pandas, NumPy, EDA, Data Preprocessing, MySQL, PostgreSQL, SQL Server

Visualization & Tools: Power BI, Tableau, Matplotlib, Jupyter, Google Colab, VS Code, PyCharm, Linux

EXPERIENCE

Software Developer & AI/ML Intern | India Tech Soft, Pune Jun 2025 – Sep 2025

- Developed software solutions using Python and SQL, applying OOP and modular programming practices with Git.
- Performed data cleaning, preprocessing and exploratory data analysis using Pandas and NumPy.
- Applied Scikit-learn for supervised and unsupervised machine learning workflows including regression, classification and clustering.
- Worked with feature engineering, model evaluation and hyperparameter tuning as part of the machine learning workflow.

AI/ML PROJECTS

Generative AI Document Q&A Assistant | Python, LangChain, Azure OpenAI, RAG, FAISS, Streamlit | [GitHub](#)

- Built a RAG-based document question-answering application using Python and LangChain.
- Implemented document processing, text chunking, embeddings and FAISS vector search for context retrieval.
- Integrated Azure OpenAI and developed an interactive Streamlit interface for document-based question answering.

Aerospace Engine Health Monitoring & Anomaly Detection | Python, Pandas, NumPy, Scikit-learn, TensorFlow, Power BI

- Developed an ML-based engine health monitoring application using Python, Pandas and Scikit-learn.
- Performed data preprocessing, exploratory data analysis and feature engineering on sensor/time-series data.
- Applied machine learning techniques for anomaly detection and visualized engine health insights using Power BI.

Project FORESIGHT – AI-Powered Demand & Inventory Intelligence Platform | Python, Pandas, NumPy, Scikit-learn, SQL, Streamlit

- Developed a demand and inventory intelligence application using Python, SQL and machine learning techniques.
- Performed data preprocessing, exploratory analysis and feature engineering using Pandas and NumPy.
- Built an interactive Streamlit application to analyze demand patterns, inventory indicators and business KPIs.

EDUCATION

MCA – Data Science, MIT ADT University | CGPA: 8.0 2024 – 2026

B.Sc. – Computer Science, MIT ACSC | CGPA: 7.9 2021 – 2024

CERTIFICATIONS

- Supervised Learning and Its Applications in Marketing
- Unsupervised Learning and Its Applications in Marketing
- Statistics for Data Science with Python
- Python for Data Analysis: Pandas & NumPy
- Databases and SQL for Data Science with Python
- AWS Cloud Technical Essentials
